Listening

Jake is worried. Listen and mark **T** for true or **F** for false.

(F) Jake doesn't know Amy.
(T) The girls talked about Amy's trip.
(F) Jake is good at geography.
(F) He is worried about flying to Chile.
(T) Rachel speaks Spanish.

Jake, remember my friend Amy?
Sure, that friendly and cute girl?
Right. I met her yesterday. She just came back from Chile and told me all about the things she did there.
Chile? In Europe?
No, silly. Chile is in South America. She had a wonderful time there.
OK.
She went skiing, visited a desert, a volcano, beautiful beaches, and the best part is she went to Easter Island.
What is so special about this island?
You don't know? Gosh, where were you during your geography classes? It's simply as mysterious as Area 51. There are giant statues called Moais. No one knows exactly why they were made.
That sounds interesting, but I'm a little worried.
Worried? Why?
To be honest, I don't speak Spanish. How am I going to understand people?
Lucky for you, I do. Come on, let's research Isla de Pascua.

By using what you heard and your general knowledge, mark the correct boxes.

X has a desert.	X has mountains.

Now listen to Rachel, check your answers and complete.

Jake ( ) is (X) isn't courageous.

Jake and I decided to go to Chile. There, we can see many different things and visit interesting places like volcanoes, mountains, the Atacama Desert, and even relax on the beach if we want to. Chile is right next to the Pacific Ocean. We are definitely going to Easter Island. I'm certain we are going to have an amazing adventure there. Jake is not as adventurous as I am, but that's okay. He can learn to be.

The Silent Giants: A Curiosity About Easter Island

Easter Island, a remote volcanic island in the Pacific Ocean, is famous for its mysterious stone statues called *moai*. These giant figures, with their long faces and solemn expressions, have fascinated explorers, scientists, and curious travelers for centuries. But who built them, and why? The island's original inhabitants, the Rapa Nui people, created nearly 900 of these statues centuries ago. Historians believe the moai represented important ancestors or chiefs, watching over the community.
What's truly intriguing is how they were made and moved. The moai were carved from volcanic rock using simple stone tools—a task requiring incredible **patience** and skill. Even more impressive is how the islanders, without modern machinery, transported these massive statues, some weighing over 80 tons, across the island. Some theories suggest they "walked" the statues using ropes, while others believe they were moved on wooden sledges. This demonstrates not only remarkable **ingenuity** but also strong communal cooperation.
However, the story of Easter Island also carries a warning. Many scientists believe that the island's civilization declined because of environmental damage. The islanders cut down too many trees to move the statues, which led to soil erosion and the loss of resources. This story attracts not just the **adventurous** but also the **reflective**—those who see it as a lesson about balance and sustainability.
Today, the moai stand as silent reminders of a creative and determined people. They attract visitors who are **inquisitive** by nature, people who are not satisfied with simple answers and who love to explore mysteries. Whether you are **daring** enough to travel to this remote island or **contemplative** preferring to read about it, the moai inspire a deep sense of wonder about human history and our relationship with the planet.
